Salah-Eddine ElOuali

Systems, Networks & Security Engineering

Security engineering student (Class of 2027) focused on offensive security, network internals, and system-level behavior. Strong understanding of protocol design (RFCs), packet processing, and virtual networking (SDN, hypervisor platforms). Experience in exploit development, reverse engineering, threat intelligence, and Red Team simulation in controlled environments.

Professional Experience

Jul 2026 – Sep 2026 **Threat Intelligence Intern**, *NearSecure*

- Led a threat-intel investigation into low-cost Android TV boxes (X96Q) and residential-proxy botnets.
- Proved the X96Q firmware insecure by design (auth-free ADB, bundled root, forged Google identity).
- Reproduced unauthenticated ADB-to-root in an Android 10 emulator; mapped it to MITRE ATT&CK.
- Reversed the native proxy payload (radare2); enumerated 10,550 Moroccan proxy endpoints (Shodan).

Aug 2025 **SOC Engineering Intern (Red Team Focus)**, *JESA S.A.*

- Automated deployment of enterprise lab environments using Proxmox and Terraform (multi-tenant labs).
- Designed segmented network architectures using OPNsense (WAN/LAN isolation, firewall policies).
- Executed Red Team scenarios including reconnaissance, exploitation, NTLM relay attacks using Impacket.
- Developed custom exploit for CVE-2025-53770 (SharePoint RCE) for controlled attack simulation.

Projects

2026 **Komainu**, *Linux EDR & Endpoint Telemetry Prototype*

- Built a Linux endpoint detection pipeline: eBPF syscall telemetry, Go agent, gRPC backend, ClickHouse storage, YAML detection rules, and a browser dashboard.
- github.com/saladin0x1/Komainu

2025 **JanusGate**, *Distributed Honeypot Project*

- Designed decentralized honeypot architecture for threat detection and attacker behavior analysis.
- github.com/saladin0x1/janusGate

Awards & Education

Awards

- $3,000+ in bug bounties from multiple programs
- Craft CMS CVE-2026-72778: Authenticated RCE (High, CVSS v3.1: 8.8)
- Real3D Flipbook (Shopify) CVE-2026-79361: postMessage XSS (reserved)
- IBM Skills Network acknowledgement | Al Homaizi IKEA Franchise (Jordan, Morocco, Kuwait) acknowledgement

5th Year – 2027 (Est.) **Computer Science & Networks Engineering (Active Student)**, *EMSI*, Tangier

Core Competencies

Security Research	Exploit Development, Vulnerability Research, Reverse Engineering, Red Team Operations, Threat Intelligence, Detection Engineering
Systems & Architecture	Network Architecture (SDN), Packet Processing, Protocol Design (RFC-based), System Design Patterns, Infrastructure as Code
Infrastructure Security	Linux Systems, Virtualization, NGFW, IDS/IPS, Network Segmentation, System Hardening
Software Design	OOP Paradigms, Design Patterns, Architecture Challenges, Secure System Design, AI/LLM System Theory
Programming Languages	C, C++, Rust, Go, Assembly (x86/ARM), Python, Java, PHP, JavaScript/TypeScript, Solidity, Bash, PowerShell, SQL

Certifications, Languages & Affiliations

Coursera	HKUST Software Engineering, University of Michigan (Python), EPFL OOP, Google (Agile Project Management), LearnQuest (Fundamentals of Blockchain Architecture)
CompTIA	Cybersecurity Analyst (CySA+)
Spoken Languages	Arabic (Native), French (Fluent), English (Fluent)
Affiliations	Cybersec.ma — Community Admin: organize meetups, manage the group, write technical content
